Work Experience

App Developer | Freelance

Duration (2024 – Present)

- Developed multiple Android apps using Android Studio for Finance, Education, and Gaming domains.
- Built cross-platform applications with Firebase backend and real-time updates.
- Integrated payment gateways, APIs, authentication, and databases.
- Published and maintained live applications on Play Store.
- Focused on problem solving, error handling, and smooth user experience.

Projects

AyoGram – Messaging & Community Platform (Personal Project)

- Developed a real-time messaging application using Flutter, Firebase Firestore & Authentication, and Cloud Functions (REST APIs).
- Implemented Provider-based state management, role-based access control, and used Cloudflare services for handling large-scale data delivery.
- Used Hive for local storage and designed a clean, responsive UI/UX with focus on performance, scalability, and smooth user experience.

Winzara — Mobile Application

- Built a production-ready mobile app with Firebase backend and real-time updates.
- Implemented wallet logic, VIP subscriptions, and rewarded ads monetization.
- Focused on stability, user flow, and live issue handling.

Education

Bachelor of Computer Applications (BCA)

Global Group of Institutes (PTU) | 2023 – 2026
